

Other than the great music and other content NOT available locally, the main reason I pay for satellite radio is the ?always available? local traffic reports. Over the air stations never deliver complete reports and you have to wait to find them... listening to a countless array of commercials and other content I?m not interested in. Particularly in Los Angeles, where traffic is a significant issue, I want traffic reports when I need them WITHOUT being inconvenienced and annoyed. THAT'S why I pay for satellite? great entertainment and timely delivery of information. This is my only option. Do not take this away from me.
